ATTN: Bev Greene Primary Healthcare Consultant

Certified Diabetes Educator/Pharmacist

The mandate of the Diabetes Group is to provide expert opinion and advice to the Chronic Disease Prevention and Management Advisory Committee (CDPMAC) and through them to support diabetes prevention and *management/control* in New Brunswick

The roles and responsibilities of the Diabetes Group are to:

- Provide expertise and advice on diabetes prevention and management/control to the CDPM AC
- Review, identify prioritize and report on collective work and proposed initiatives on diabetes prevention and management/control
- Function in an integrative role to align existing policies and programs, as appropriate.
- Recognize and align decisions and directives in their work as appropriate with the provincial health plan and chronic disease strategy.

The Task Group will focus on the continuum of *primary* care from prevention to control with a particular focus on early detection, screening, and the prevention of complications of diabetes. The Group acknowledges that the broad context of diabetes includes the continuum of care for individuals with different types of diabetes (type 1 diabetes, type 2 diabetes and gestational diabetes) .This will require different strategies for prevention and interventions for optimal management/control.

DATE	LOCATION	DESCRIPTION
January 2010 (Winter edition of <i>Diabetes Care News</i>)	Canada wide distribution	Wrote article on “Treating the Common Cold and Type 2 Diabetes”. Discussed therapeutic options for treating the common cold and how to approach using these treatments in people with diabetes including concerns about co-morbidities and interactions.
November 14,2010 & November 21,2010	Discovery Channel Canada Wide on TV channel Available on CDA website Available on DiscoveryHealth Website	Participated as a member of the patients’ team in helping them manage their diabetes. My role exemplified the expanding role of pharmacists involved in the day to day management helping people with Diabetes as they learn to manage their disease. The 1 hour show examined the various members of the team including the specialist, family doctor, nurse educator, dietitian AND PHARMACIST and the person with diabetes as they journey through various aspects of their diabetes stages. (i.e. diagnosis, treatment, insulin therapy etc)
